

# Fire Engine and Police Car Puzzle

**Directions:** For each student, glue a copy of the puzzle onto a piece of posterboard. Allow students to color their copies of the puzzle. Laminate the puzzles or cover them with clear contact paper. Cut out the pieces and place each set in a reclosable plastic bag or an envelope for students to take home. Have students work with family members to put the puzzles together. Encourage students to tell their families what they have learned about the community workers who keep us safe.
